TRANSFORMER AND VESSEL ASSEMBLY

### QL INDUCTION CONVERSION KITS

Sequoia Lighting conversion QL Induction Retrofit unit converts your existing fixture into an energy efficient, ultra long life, instant ignition fixture that is ideal for facilities needing virtually maintenance free lighting. All of Sequoia Lighting's QL Induction systems have an unprecedented lamp life of 100,000 hours, ignite instantly and do not need a separate starter. This fixture incorporates the high reliability of instant hot and cold re-strike along with a color rendering index of over 80 and no color shift throughout lamp life. All QL conversion kits allow you to use existing luminaires without having to purchase expensive new fixtures. By upgrading to a more efficient lighting source, you can take advantage of the increased lumens per watt, longer lamp life, reduced maintenance and energy costs. Conversion kits are completely assembled allowing for quick and easy field installation.

\*Please consult factory for QL Induction Specifications
