

SPECIFICATIONS

All Sequoia Lighting cross arm assemblies are fabricated from heavy duty steel. Each cross arm assembly is designed to fit securely around any type of pole. Cross arm assemblies can accommodate up to six 1500 watt fixtures. All cross assemblies are pre-drilled at the factory to accommodate the specified fixture type. All hardware provided is either hot dip galvanized or stainless steel.

FINISH

All cross arm assemblies are cleaned, etched and primed prior to painting. Standard colors for cross arms are black, bronze, green and verde patina powder coated or wet sprayed. Custom colors and special finishes along with hot dip galvanizing are also available.
